

# AjaxIntroduce Joomla Module

## User Guide

### Ekansh Preet Singh

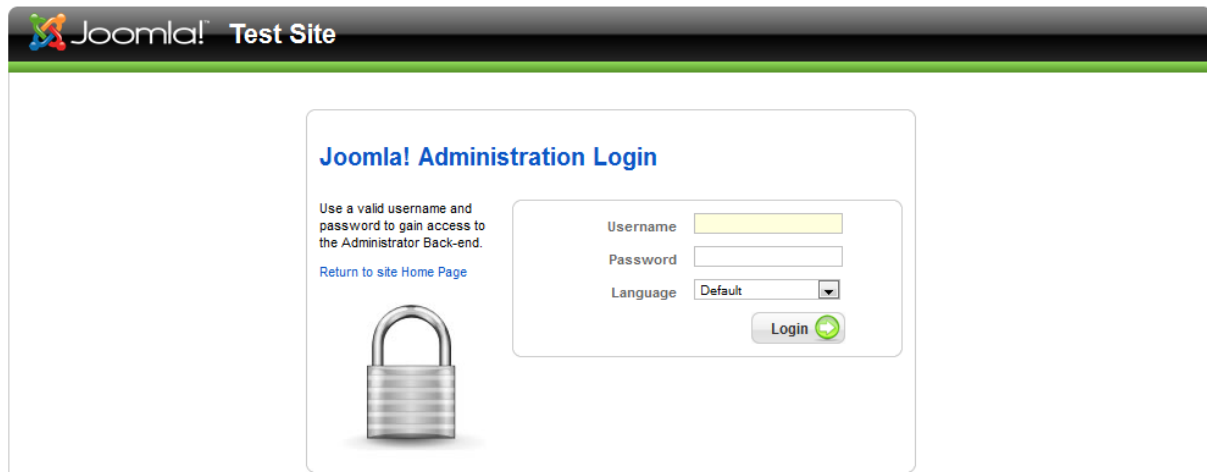

My role with NSITOnline started with an automation project, which I landed up in out of nowhere. My first project was to develop a feature to link together the databases of NSITOnline website and the google email accounts offered by NSITOnline. Quite an uphill task at one point of time, it ended up being a great learning curve for me and even though it took me a couple of months to complete the task and I faced a number of hurdles on my way, my seniors always showed faith in me and my abilities, a great moral booster for me.

Since then I have moved over to taking up more collaborative, more comprehensive roles in the team, roles that not just test your technical skills, but also your managerial skills, ones that need you to work efficiently in a team environment.

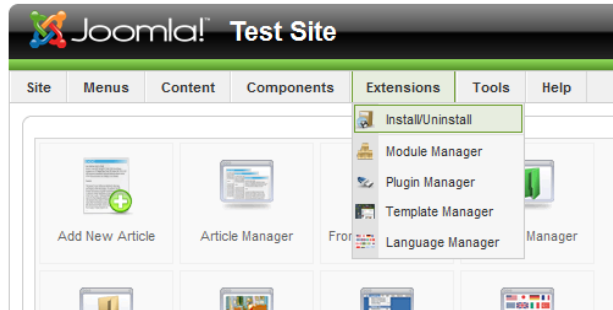

During my short stint with NSITOnline, I have learnt how to not give up even when things don't turn out the way you expect them to, to be able to work in a team, to be able to coordinate amongst your peers for bringing out the best in not just yourself but the entire team as a whole, and to be able to manage your time in the best possible.
